

BLE LBS freeRTOS DEMO with softdevice s115

Demo use SEGGER Embedded Studio Release 8.24 Build 2025041401.59002 & FreeRTOSv202411.00 to develop, nrfx 3.11 , nRF54L15 DK.

How to flash?

1. nrfutil device recover
2. nrfutil device erase
3. cd Source\softdevice\s115
4. nrfutil device program --firmware s115_9.0.0-3.prototype_nrf54l15_softdevice.hex --options chip_erase_mode=ERASE_NONE
5. open freertos_54l15.emProject using ses, and compile & download.
6. You can check the log in com.

Todo list

Source\softdevice_handler\nrf_sdh_soc.c

softdevice_rng_seed function currently is implemented simply for demo, you can generate stronger RNG in your way for better safety .
